# PHA5561 Pathophysiology and Patient Assessment

## II

Spring 2021

3 Credit Hours – [A-E Grading]

---

*The Pathophysiology and Patient Assessment II course is the second of a two-course sequence that provides students with an integrated knowledge base in the physiological functions of the human body to prepare students for the understanding of pathological changes pertinent to the development and progression of various diseases. Corollary to the establishment of a solid understanding of human pathophysiology, key concepts will be reinforced through the application of learned knowledge to problem solving in the simulated patient assessment modules built into the course sequence.*

## Entrustable Professional Activities

This course will prepare you to perform the following activities which the public entrusts a Pharmacist to perform:

Patient Care Provider Domain

1. Collect information to identify a patient's medication-related problems and health-related needs.
  - ST1.1 Collect a medical history from a patient or caregiver.
2. Analyze information to determine the effects of medication therapy, identify medication-related problems, and prioritize health-related needs.
  - 2.1. Assess a patient's signs and symptoms to determine whether the patient can be treated within the scope of practice or requires a referral
  - ST2.2. Measure an adult patient's vital signs and interpret the results (e.g., body temperature, pulse rate, respiration rate, and blood pressure)
  - ST2.3. Interpret laboratory test results

## Course-Level Objectives

Upon completion of this course, the student will be able to:

1. Differentiate between the mediators for innate and adaptive immunity and describe their involvement in immune responses
2. Understand the roles of various mediators in the inflammatory responses
3. Describe how the gastrointestinal system functions and the pathophysiology of common gastrointestinal disorders related to disruption of motility, absorption or secretion.
4. Describe the endocrine control of: male and female reproduction and growth
5. Describe endocrine control of glucose, lipid, thyroid hormone and calcium homeostasis.
6. Describe the endocrine factors contributing to regulation of appetite and satiety
7. Understand the pathophysiology of glucose and lipid metabolism in types of diabetes.
8. Describe the pathophysiology of the neurological system including the following: excitatory and inhibitory amino acids, neurotransmitters, and sensory processing.
9. Understand the neurocircuitry for movement regulation and the pathophysiology related to movement disorders
10. Describe the brain blood supply system and the pathophysiology related to stroke development.
11. Describe the physical signs and lab values that represent the physiological changes that occur in the following systems which are discussed during this course:
  - a. Immunological
  - b. Gastroenterological
  - c. Endocrine
  - d. Neurological
12. Collaborate as a team member and solve a problem/case that requires interpretation of pathophysiological findings including lab values, patient assessment findings, and diagnostic procedure results.

## Course Pre-requisites

1. PHA5560: Pathophysiology and Patient Assessment I
2. PHA5103: Principles of Patient-Centered Care

## Course Co-requisites

1. There are no co-requisites for this course.

## Course Outline

Please routinely check your campus calendar and the Canvas course site for any messages about changes in the schedule including meeting dates/times, deadlines, and room changes.

## Student Evaluation & Grading

*Evaluation Methods and How Grades are calculated.*

Assessment Item	Grade Percentage
iRATs [4]	8%
tRATs [4]	8%
GI question writing	1%
Quizzes (4 @2.5% each)	10%
Exam 1	21%
Exam 2	21%
Exam 3	31%
<b>Total</b>	<b>100%</b>

Table 1. Grading Scale

### Rounding of grades:

Final grades in Canvas will be rounded to the 2<sup>nd</sup> decimal place. If the decimal is X.495 or higher, Canvas will round the grade to X.50. The above scale depicts this policy and grades are determined accordingly. Grade assignment is made using this policy and NO EXCEPTIONS will be made in situations where a student's grade is "close."

## Educational Technology Use

The following technology below will be used during the course and the student must have the appropriate technology and software.

1. ExamSoft™ Testing Platform
2. Canvas™ Learning Management System
